### Dash Cam Black Box

**iGO CAM 60**  
- Camera Resolution: 1296p 2K  
- 2.7” LCD Colour Screen  
- 3 Axis G-Sensor  
- Parking Mode*  
- Ultra Wide View 150°  
- GPS Geotagging  
- Large Speedo Display  
- Speed/Red Light Camera Warnings  
- Lane Departure Warning*  
- Low Headlight Warning  
- Advanced Driver Assist System*  
- Smartphone App (Uniden iGO)

**iGO CAM 70R**  
- Video Resolution: 1524p 2.7K  
- 2.7” LCD Colour Screen  
- 3 Axis G-Sensor  
- Parking Mode*  
- Ultra Wide View 150°  
- GPS Geotagging  
- Large Speedo Display  
- Speed/Red Light Camera Warnings  
- Lane Departure Warning*  
- Low Headlight Warning  
- Advanced Driver Assist System*  
- Direct footage transfer to smartphone, WiFi Enabled

**iGO CAM 80**  
- Video Resolution: 2160p 4K  
- 2.4” LCD Colour Screen  
- 3 Axis G-Sensor  
- Parking Mode*  
- Ultra Wide View 150°  
- GPS Geotagging  
- Large Speedo Display  
- Speed/Red Light Camera Warnings  
- Lane Departure Warning*  
- HDMI Output  
- Footage Lock Protection  
- Wide Dynamic Range Images (WDR)  
- Smartphone App (Uniden iGO)
When the car and the unit have been powered off, this mode turns on the unit, if it detects vibration. Note that the unit must have sufficient battery power remaining in order to record and the G Sensor must also be turned on. The Lane Departure feature requires correct calibration to capture road markings. Lane Assist is ideal for driving on main highways with good road markings. Lane Departure will be limited in poor visibility or where there are inconsistent or faded road markings. For this to work ADAS Detect option must be turned on and it also requires correct calibration. This feature is designed and best suited to open road driving such as a motorway.

128GB (iGO CAM 60/70R), 64GB (iGO CAM 80), 32GB (iGO CAM 50R/40/30) is the maximum Micro SD capacity, Class 10 minimum speed for recording. Recommended to use MLC/SLC Micro SD Card.† Image on packaging is for illustration purposes only. Captured footage is dependent on the position and location of the vehicle dash cam & rear/reverse camera. iGO CAM 70R the single camera recording utilises the front dash cam camera only. In this mode it will record at 2.7k (1524p) resolution.

If dual camera recording mode is selected then both front dash cam camera & rear/reverse camera will record at Full HD (1080p) resolution.
